**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. The rejections over Fusco et al. and Waring are withdrawn in view of applicant's arguments. A new grounds of rejection using Waring is given below. Full consideration of applicant's arguments regarding JP-'854 is being deferred pending obtaining a full human translation of the reference including the headings from the PTO translation department.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1794

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 1-12 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Masanobu et al. (JP-10298854-A).

See the English Abstract of Masanobu et al. The reference appear to have substantially similar sized and shaped protrusion patterns to those instantly claimed and appear to function in the same way. Thus it is taken as being either substantially the same as the instant claims or having only minor obvious differences from the instant claims. As the PTO does not have experimental facilities, burden of evidence is shifted to applicant. See MPEP 2112.

5. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Waring (U.S. 5,887,280) in view of Boyton (U.S. 4,956,878).

Waring teaches wavy projections which are flexible to reduce drag (Figures 4g and 5, and col. 6, lines 10-15).

Art Unit: 1794

Boynton teaches the use of elastic fabric in a swim suit to allow adequate support and freedom of movement (abstract). The instant invention claims a compressible fabric swim suite with wavy projections. It would have been obvious to one of ordinary skill in the art to used the elastic material of Boynton in the suit of Waring in order to allow adequate support and freedom of movement in the combination along with decreased drag from the projections of the combination. The elastic material of Boynton is taken as having the instant claimed micro compression ratios.

6. Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Watkins III whose telephone number is 571-272-1503. The examiner works an increased flex time schedule, but can normally be reached Monday through Friday, 11:30 A.M. through 8:00 P.M. Eastern Time. The examiner returns all calls within one business day unless an extended absence is noted on his voice mail greeting.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached on 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
